

# 12-inch SA Polycarbonate Pedestrian Signal

**EAGLE**<sup>®</sup>  
Traffic

## Description

Designed to be virtually maintenance free, the polycarbonate signal's body, door and visor are manufactured from color impregnated materials. Peeling and corrosion are eliminated and scratches diminished. Eagle signals meet or exceed ITE specifications. Eagle hardware or other industry standard hardware may be utilized for mounting.

All legends are clearly visible and definable for any width street with ample safety factor. Design provides minimum weight but maximum rigidity and strength.

## Housing

One piece polycarbonate unit with serrations in 5° increments at each end. Each housing has provisions for mounting two terminal blocks. Housings may be fastened together to make multi-section signals.

## Visor

Removable extruded ABS. Available in tunnel or cutaway style.

## Positive Positioning

Molded serrations provide positive locking of section or complete signal in any of 5° increments about the vertical axis.

## Hinges

Enclosed hinges provide a modern appearance. All hardware is stainless steel.

## Mounting

Completely compatible with all standard signal hardware.
